

Eng. Abeer Mahmoud Ramadna **Director of the Industrial Scientific Research and Development Support Fund**

Eng. Abeer Mahmoud Ramadna serves as the Director of the Industrial Scientific Research and Development Fund, leading efforts to enhance industrial innovation and support sustainable economic growth. In her role, she focuses on aligning the fund's activities with Jordan's Economic Modernization Vision, promoting scientific research and development in the industrial sector, and contributing to the achievement of Sustainable Development Goals (SDG8, SDG9) through advanced research, technology integration, and sustainable policy development, in line with the vision of the Higher Council for Science and Technology.

Eng. Abeer holds a master's degree in Industrial Engineering from the University of Jordan with honors and a bachelor's degree in Industrial Engineering from the same university (1997). She further strengthened her leadership expertise by completing an advanced program in strategic planning, policy formulation, and executive leadership at the Royal Military Academy Sandhurst in the United Kingdom.

With over 20 years of professional experience in the industrial sector and economic activities, she has held key strategic roles at the Ministry of Industry, Trade, and Supply, where she played a pivotal role in developing and implementing national sectoral policies and plans to enhance the business environment, increase industrial sector competitiveness, and achieve sustainable industrial development. She has led numerous technical teams and specialized committees at both national and international levels and has contributed to coordinating public-private sector cooperation to support sustainable development goals, empower women economically, and promote entrepreneurship. Additionally, she has managed projects aimed at linking support programs with the industrial sector and developing regulatory and inspection strategies for economic activities in line with global best practices.

On the international front, she has represented the Ministry in official delegations to discuss international economic policies and strengthen Jordan's cooperation with global partners. Furthermore, she has published research in both Arabic and English on topics such as e-government, the Fourth Industrial Revolution, sustainable development, industrial sector competitiveness, total quality management, regulatory and inspection systems, and excellence award programs.

Eng. Abeer's expertise extends to advanced strategic planning, future foresight studies, and economic policy development. She holds an impressive record of professional certifications and international accreditations, including: Certified Consultant Engineer in Project Management, Quality and Environmental Management, and Industrial Engineering from the Jordanian Supreme Council for Engineering Qualification and Accreditation, National Certified Consultant in Environmental Management (ISO), Certified Innovation Partner from the Global Innovation Management Institute (GIMI), Certified Management Development Expert from the International Trade Centre (ITC), ISO 9001:2015 Lead Auditor (Certified Quality Management Systems Auditor), Certified EFQM 2025 Assessor for the European Excellence Model.

Eng. Abeer has distinguished herself by winning three **Stevie Awards for the Middle East and North Africa in 2020**, securing **gold, silver, and bronze medals** in recognition of her excellence in leadership and innovation.

In her current role, she continues to lead efforts to foster industrial innovation and economic sustainability through fund management, aiming to build strategic partnerships between the industrial sector and research institutions while directing investments toward advanced applied research to enhance the competitiveness of Jordanian industries both locally and globally.
